APPLICATIONS

The DD15/DD13 engine is a heavy-duty engine that is intended for all heavy-duty on-highway truck and coach applications, and features improved fuel economy and enhanced performance.

REVIVA PROCESSES

Reviva utilizes state of the art machines and machining methods to ensure quality. All components are magnafluxed, inspected and machined to OEM specifications.

Blocks are magnafluxed, upper & lower counter bores are repaired as needed and align honed or align bored if needed to OEM specifications.

Cylinder heads are magnafluxed, pressure tested, and new valve guides and new valves are installed in every head and valve seats are machined to OEM specs then vacuum tested to ensure quality.

Crankshafts are magnafluxed, straightened if needed and polished or ground undersized.

Connecting rods are magnafluxed and have new rod bushings installed and machined to OEM specification.

All Reviva engines are assembled in the USA.

TO PLACE AN ORDER

Before calling to request price and availability please gather the following information:

- The original VIN
- The original engine serial number

The serial numbers are located on the valve cover.

QUALITY PROCESSES

All long blocks are SIM tested
